Space

WHY CHOOSE US

Tailored innovative solutions for your industry needs

Latest satellite technology for high accuracy & frequent updates

Expert support to find the right solution

SOLUTIONS

Remote Sensing & Downstream Space

Advanced analysis and interpretation of satellite imagery and aerial data

Platform development and integration WebGIS Platforms

Custom development of GIS solutions for spatial data management

Vessel traffic monitoring

Detection algorithms for identifying AIS information, ships, dark vessels etc

Photogrammetry & Aerial Mapping

High-precision mapping and 3D modeling using aerial photography and satellite imagery
