A New Era Begins: Octave Is Here

Hexagon's Safety, Infrastructure & Geospatial portfolio is now part of **Octave**, bringing together decades of expertise with a shared mission: to unleash intelligence at scale. As a **Diamond Authorized Reseller**, Geosystems Hellas is proud to deliver Octave's advanced geospatial technologies, solutions and expertise to customers, helping them transform complex data into actionable intelligence.

Octave provides mission-critical software that supports organisations throughout the entire asset lifecycle, from precision design and real-time construction visibility to improved operational performance, safety, security and resilience.

with vessel Spot

Vessel Spot is Geosystems Hellas' advanced maritime monitoring solution, combining Earth Observation imagery, AIS information and machine-learning algorithms to detect, identify and track vessels across large maritime areas. The platform can identify vessels operating with active AIS signals, as well as "dark vessels" that have switched off their reporting equipment to avoid detection.

Geosystems Hellas at BEYOND Expo 2026

We participated in BEYOND Expo, held in June 2026. At its stand, the company showcased innovative solutions developed through the BorderForce, THEIA and Golden Twins initiatives, covering border surveillance, crisis intelligence, forest-fire and flood monitoring, and vessel monitoring. A key highlight was the participation of CEO Betty Charalampopoulou in the panel "Shield & Sword: The Rise of Greek Defence Tech," where she discussed the role of geospatial and space-based technologies in supporting security and innovation.

Geosystems Hellas at the Greek Space Tech Forum 2026

We also participated in the Greek Space Tech Forum in July 2026 as a Premium Corporate Participant. During the event, the company connected with key representatives of the Greek and European space ecosystem, including Dimitris Papastergiou, Greece's Minister of Digital Governance, explored new collaboration opportunities and highlighted its contribution to the development of innovative satellite applications and services.

Geosystems Hellas Project News

Geosystems Hellas at the Final OCEANIDS Plenary Meeting

Geosystems Hellas supported the final OCEANIDS Plenary Meeting in Crete, a two-day event dedicated to reviewing the project's achievements, final milestones and innovative solutions for a more resilient Blue Economy. The meeting brought together project partners, Advisory Board members and external experts to exchange feedback and prepare for the final project review. Through its contribution to the project and the organisation of the meeting, Geosystems Hellas reinforced its commitment to Earth Observation, climate adaptation and sustainable coastal and maritime development.

Geosystems Hellas at the Third TOPIO Summer School

Geosystems Hellas participated in the third TOPIO Summer School in Terelle, Italy, bringing together researchers, students, local authorities and citizens. Geosystems Hellas contributed through the TOPIO geospatial PPGIS platform, demonstrating how participatory tools and geospatial data can strengthen collaborative and evidence-based decision-making. The event explored how geoinformatics, Earth Observation, Digital Twins and public participation can support the sustainable management of the Monte Cairo landscape.
