Geosystems Hellas Products, News & Projects

Welcome to the **Geosystems Hellas' September Newsletter!** We're excited to share our latest news, project milestones, events and developments.

[Here's what's new this month.](#)

Octave Imagine 2025 Update 1 Released

Octave Imagine (formerly ERDAS IMAGINE) **2025 Update 1 (v16.9.1)** is now available, delivering faster raster processing, improved spatial modeling, enhanced SAR and point-cloud analysis, better 3D visualization, and broader data support. The release also includes security and usability improvements.

Release Announcement

Golden Twins: Final Review Milestone & Innovation News

[Subscribe](#)[Past Issues](#)[Translate ▼](#)

The **Golden Twins SAT Review** took place in Heraklion, Crete, marking one of the project's final milestones toward operational readiness, where the platform and its services (**GTFire**, **GT Flood**, **GT Maritime**) were executed and their results were presented to ESA reviewers. At the same time, Golden Twins is featured in the **September edition of Innovation News Network** (page 46), highlighting its Earth Observation services for wildfire, flood and maritime monitoring.

SAT4FOREST: From Project Completion to RETASTE 2026

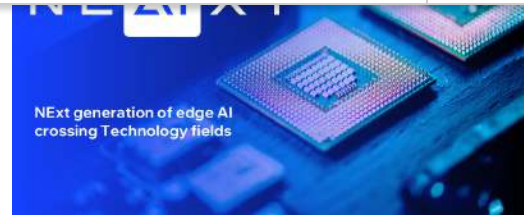

The **SAT4FOREST** project first phase has been completed, delivering Greece's first integrated satellite-based forest monitoring system with 2 modules: **Forest and NATURA Areas Health Assessment & Forest and NATURA Areas Threat Monitoring**. As co-prime contractor, we contributed to the development and integration of the services. The project was also presented at **RETASTE 2026 in Rethymno**, through the paper "**Sat4Forest: Mapping and Monitoring of Greek Forests for the Greek National Satellite Space Project.**"

NeAIxt Reaches First AI Detection Milestone

[Subscribe](#)[Past Issues](#)[Translate ▼](#)

concludes, the first version of our **AI-based detection algorithm** for natural disaster monitoring is now available to ecosystem partners. The next phase will focus on model optimization, hardware performance testing, and validation across different datasets, bringing the solution closer to reliable onboard deployment.
